SUMMARY

Backend-focused Computer Science graduate skilled in **Java, Python, JavaScript, Node.js, SQL**, and **MongoDB** with hands-on experience in **API development, open-source contribution**, and scalable application development. Contributed **40+ merged successfully pull requests** and passionate about **backend engineering** and **problem solving**.

EDUCATION

Sri Venkateswara College of Engineering & Technology

Chittor, Andhra Pradesh, India

B. Tech in Computer Science and Engineering (CGPA – 8.08)

Oct 2021 – April 2025

SKILLS

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, JDBC

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, Docker, GitHub Actions, Jenkins, CI/CD, GCP

EXPERIENCE

Open-Source Contributor – Apache Maven & OWASP

2025 - Present

- Contributed to open-source projects by improving **documentation** and **fixing bugs**.
- Gained experience in **version control**, code review processes, and maintaining clean, readable documentation.

Open-Source Contributor — Hacktober fest

Oct 2025

- Contributed to multiple open-source repositories during **Hacktober fest** by submitting meaningful pull requests for code optimizations, API updates, and documentation.
- monstrated proficiency in collaborative development using **Git, GitHub**, and **Maven**, adhering to strict industry-standard workflows and code reviews.

Skilldzire – Full-stack Development Intern

Dec 2024 – Apr 2025

- Completed a web development internship focusing on core **full-stack** concepts and responsive design principles.
- Developed a dynamic **Weather Application** capable of fetching and displaying real-time forecast data via API integration.

PROJECTS

Multi AI Interview Coach Agent – Kaggle Agents Intensive Capstone Project

[Link](#)

- Engineered an interactive interview platform using **Python** and **Streamlit**, employing a multi-agent architecture (Orchestrator, Interviewer, Evaluator) for adaptive, timed assessments.
- Implemented automated scoring and comprehensive feedback generation, utilizing **SQLite** to manage session memory and track user performance history.

Attendance System – Python, OpenCV, SQL

[Link](#)

- Engineered an automated attendance solution using **Python** and **OpenCV** to capture and verify student identity via real-time facial recognition.
- Implemented a **SQL database** integration to securely store student profiles and accurately log daily attendance records.

Secure Portal Layout & Responsive Auth Gateway – React, Node.js, Express, MongoDB

[Link](#)

- Engineered a secure session architecture utilizing **HttpOnly cookie payloads** and **JWT**, completely neutralizing client-side Cross-Site Scripting (**XSS**) token extraction vulnerabilities.
- Overrode browser navigation using custom React hooks to **block the back button after logout**, preventing unauthorized users from accessing **cached dashboard data**.
